GLOBE

S2 – 2024

Every day is an opportunity to make something out of nothing. Waves are flat? Weather's looking grim? Homies aren't around..? Got two choices friends - sit idly home, or get out there and find another way to get after it. A new board always makes the latter a worthwhile, better choice.

As one the world’s largest manufacturers of premium skateboards, we clearly use a significant amount of wood in our production. In order to offset the timber we use to construct our skateboards, our goal is to engage in forestry efforts that replace far more than we consume. To that effect, we have partnered with the National Forest Foundation (NFF) to donate to their tree-planting program. Our ongoing donations to the NFF plant at least 3 times the amount of trees we harvest annually in the making of our skateboards.

We continue to bring more sustainably sourced materials to our skateboards line, while still ensuring that durability and skate function are driving our design process. We’re far from perfect, but trying to move forward one step at a time. Some of our sustainable materials include:

BAMBOO CONSTRUCTION

The fastest growing “tree” on earth, bamboo is harder and a little stiffer than hard rock maple. The harvesting process doesn’t require replanting and crops mature many times over in the span it takes maple trees to grow.

SUPER-SAP® RESIN

USDA certified biobased resin made with recycled industrial waste-stream components and renewable raw materials. Backed by hard data, Entropy Resins reduce energy use, emissions, and environmental impact during their manufacturing process. Super Sap replaces petroleum-based raw materials without sacrificing performance.

ALGAE FOAM TAILPADS

BloomTM transforms air and water pollution into a renewable composite material. By harvesting algae from contaminated waters, BLOOM creates a petroleum free and renewable material that we are able to use in place of virgin materials in the construction of our tailpads.

COCONUT CONSTRUCTION

The natural coconut fibers on the surface of our boards allow us to use less maple wood and turn a waste stream material into valuable face plys. Coconuts are readily available, the husk requires minimal processing and they come from self-sustaining crops.

RECYCLED RUBBER GRIP

What happens to worn out shoes and car tires at the end of their lifecycle? In most cases, they become landfill, never really breaking down, destined to sit in a pile on this earth for millenia. Together with local industrial waste, we’ve turned them into a more environmentally sustainable approach to griptape and EVA foam.

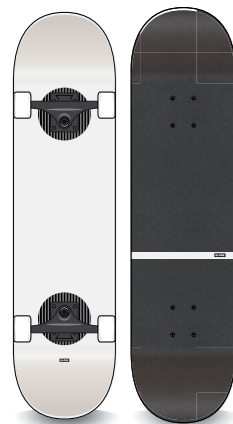

RECYCLED PLASTIC

We’ve moved away from the use of virgin plastic parts from our complete skateboards and components. Most noticeably, all riser pads and deck slide rails are being made from recycled industrial waste.

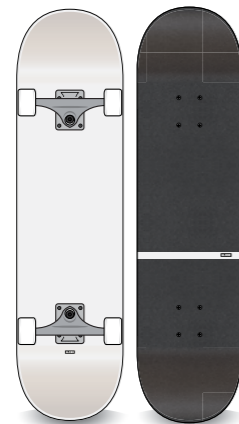

Quality. Innovation. Guaranteed.

Algae Foam Tailpads

BLOOM™ transforms air and water pollution into a renewable composite material. By harvesting algae from contaminated waters, BLOOM™ creates a petroleum free, organic and renewable material that we are able to use in place of virgin materials in the construction of our tailpads.

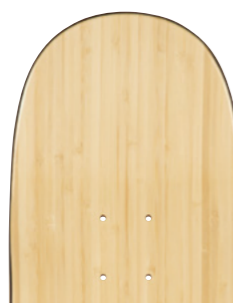

Recycled Rubber Grip

What happens to worn out shoe sand car tires at the end of their lifecycle? In most cases, they become landfill, never really breaking down, destined to sit in a pile on this earth for millenia. In this case.. they become a more environmentally sustainable approach to griptape and EVA foam.

Griptape

Globe and Slant range in various grits and aesthetics. Our basic black griptape uses high grade silicon carbide while rugged grip tuned for downhill speed utilizes much thicker, sharper grit for locked-in footing. Clear griptape is micro-perforated and impressively clear. And graphic printed griptape is formulated for long-lasting vibrance.

Bamboo + Super Sap® Resin

Bamboo with Canadian maple support plys. Moulded with Super Sap®, a USDA certified bio-based resin made with recycled industrial waste and renewable raw materials. A lower velocity construction without sacrificing performance.

Impact Support

Impact carbon fiber laminate discs disperse impact shock from the truck mounting points which makes them stronger, adds more pop, and last longer than normal decks.

Resin Construction

Epoxy resin is used to press all of our boards which make them lighter, stronger, and longer lasting than normal water-based decks.

Coconut Construction

The natural coconut fibers found on these boards allow us to use less maple wood for an eco-friendly deck that leaves a smaller carbon footprint. Coconuts are readily available, the husk requires minimal processing and they come from self-sustaining crops.

Bamboo

The fastest growing "tree" on earth, bamboo is harder and a little stiffer than hard rock maple. The harvesting process doesn't require replanting and crops mature many times over in the span it takes maple trees to grow.

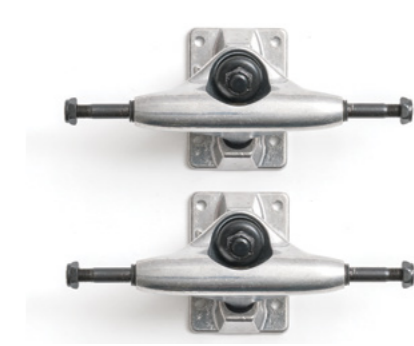

Slant Surf/Skate Truck

Progress your surfing when you're not in the water. Magnesium trucks, 20% lighter than aluminum. Seamless riser pad integration, made from recycled plastic. Optimized ride height for pushing and carving. Fluid design lines inspired by the ocean.

Slant Reverse Kingpin Trucks

Typically used on models greater than 34" long. Reversible 50/54° hangers. 50° for stability at high speeds. 54° for tighter, more responsive turns. Also available in super lightweight magnesium.

Tensor Alloy Trucks

Made in premium Aluminium and magnesium to produce the best quality skateboard truck on the market. All Tensor trucks feature Grade-8 kingpins and high-rebound urethane bushings. Tensor Magnesium trucks are 20% lighter than Aluminium with the same smooth grind. And they're guaranteed for life.

Regrowth

Our donation to the NFF will plant more than three times the amount of trees we harvest annually in the making of our skateboards.

Single Deck Press

Individual pressing ensures that every deck feels exactly the same.

Resin-7

Lighter, stronger, and longer lasting than normal water-based glues.

Lifetime Warranty

Slant and Tensor trucks are guaranteed for the life of the product.

Performance Wheels

Globe's high-rebound urethane formulas are abrasion resistant, smoother, faster, and provide excellent grip.

Abec-7 Bearings

Standard on every complete, Globe Abec-7 bearings spin faster and longer which means less pushing and faster speeds.

High-rebound Bushings

Our high-rebound 92a durometer bushings are used in a variety of shapes across the line to match the functionality of each board.

GLOBE BRAND + EAMES OFFICE

10025453_BWRED

La Chaise
5 x Decks 8.25" x 32" x 14.25" wb

Eames La Chaise Box Set

NEW

Created to honor the 75-year anniversary of La Chaise, an icon of modern furniture design originally created by Charles and Ray Eames for MoMA's 1948 Low Cost Furniture Competition. This wall art series might speak to some as abstract photographic art, others as an important milestone in manufacturing, and to those who skate as an intriguing spot.. perhaps to a select few, all three.

Limited edition run of 100 box sets.

Featured Artist

HIROTTON CRUISERBOARDS

Japanese artist/Illustrator Hiroton comes together with Globe to create a series of board graphics based on animals with laser eyes. Because lasers...

Inspired by punk and skateboarding culture while promoting living things coexisting with nature, Hiroton's style is unique and growing wildly in popularity.

Featured Series

WAVE WIZARD SURF/SKATES

It's hard work out there trying to make something outta nothing. That is, unless you've been skunked on waves and all you're looking to do is get some turns in. If that's the case this series of surf/skates is pure sorcery, and more than capable of bringing the vibe back to 100. The styling of these boards is fast and flammable, and the wheelbases are sharp and ultra responsive. Thou shall not be denied a good time!

Featured Series

HOT NEW LONGBOARDS

Comin' in hot, these new boards have evolved from their classic roots to meet longboard riders where their needs are. A more compact Prowler Mid with some added rocker and wider foot platform becomes a lively pusher. The nature of the Outlier's shape and component setup makes it very carve friendly and improves upon our previous Cutler shape as a great choice for lady shredders. With candy-colored marbled flames, these are our new hot 'n spicy favorites.

New Category

GOODSTOCK PROTECTIVE GEAR

Goodstock stands for great value, in considered Globe product. Goodstock is years of refinement within a category we know inside and out and can bring added detail at a sharp, competitive price point. Always replenish-able, consistent offering, quality that our buyers and their customers can depend on. In the name of progression, Globe's entry into the protective market is aimed at providing riders of all ages good, considered, quality, affordable protection against slams.

STREET SERIES

Decks and completes tuned for pros to groms, and something for everyone in between. Made in our DSM factory founded by one of skateboarding's icons, Rodney Mullen.

A close-up, diagonal view of a skateboard truck. A red sticker with the word "GLOBE" in white capital letters is affixed to the side of the truck's hanger.

SURF/SKATE BOARDS

It's not training.. we're just living what we love. Skateboarding, surfing, and walking an alternate path is in the DNA of Globe. Our skate and surf teams see performance and style differently than the traditional pathway of competitions and judges. Why would we treat this series of boards any differently.

25% Lighter.
Lower Ride Height.

Quality. Innovation. Guaranteed.

Globe Surf/Skate boards come standard with Slant™ Magnesium Surf/Skate Trucks. They're significantly lighter than aluminum trucks, have a lower center of gravity with integrated riser pads, and are backed by the Slant™ trucks guarantee. Our boards can be pumped to generate momentum, or pushed like a normal cruiser. They are skateboards after all.

OFFSHORE WE SURF

ACCESSORIES

Our tight range of essential skateboard accessories for all types of skateboarding. Uniquely considered skateboard components, built on our founding principles – Quality. Innovation. Guaranteed.

WHEELS

G1 Street Wheel

Our standard rounded street wheel.

10125037

_WHTBLKBAR

White/Black/Bar
52mm | RS 16mm | 99a

- All-purpose rounded street wheel
- Standard formula
- Grooved riding surface

WHTBLKFLM

White/Black/Flames
54mm | RS 16mm | 99a

G2 Conical Street Wheel

Wider surface area street wheel shape made with super high rebound urethane

10125038_WHTESS

White/Essential
53mm | RS 18.5mm | 101a

- Wider riding surface for extra stability and a face that cuts back toward the core for weight reduction and added response
- Long lifespan street formula
- Grooved riding surface

White/Essential
55mm | RS 19mm | 101a

Flatsider Cruiser Wheel

Flat faced wheel with rounded lip and wide riding surface

10125036_WHTRED

White/Red
60mm | RS 38mm | 80a

- Wide cruiser feel that breaks free easily into slides
- Soft for cruising, holds turns and slides consistently
- Stoneground for traction from the first push

Softsider Cruiser Wheel

Superb feel in the pool and on freestyle boardwalk tricks

10125039_WHTRED

White/Red
65mm | RS 41mm | 78a

- Wide riding surface with rounded lips that cut back toward a large outer core
- All-terrain urethane that rides much stiffer when combined with extra-high rebound core
- Stoneground for traction from the first push

WHEELS

Bruiser Cruiser Wheel

All terrain cruiser wheel with street performance shape and characteristics

10125016

_WHTRED55

White/Red/55

55mm | RS 24mm | 88a

- A little wider than a traditional street wheel with a face that cuts back toward the core for weight reduction and added response
- Friendly to all-terrain
- Stoneground for traction from the first push

Conical Cruiser Wheel

The hands-down most popular cruiser and longboard wheel shape for smooth rides

10125042

_WHTRED62

White/Red/62

62mm | RS 47mm | 78a

- Ideal for cruising and carving on any surface
- Super sticky, holds turns and slides consistently
- Stoneground for traction from the first push

_CLRAQUA

Clear Aqua

55mm | RS 24mm | 83a

_WHTRED58

White/Red/58

58mm | RS 26mm | 88a

_CLRHNEY

Clear Honey

58mm | RS 26mm | 83a

70mm | RS 47mm | 78a

_CLRAMB

Clear Amber

70mm | RS 47mm | 83a

Roundabout Onshore Wheel

Rounded lip and full conical cut back on face and back make this our best performing surf/skate wheel

10125040_WHTRED

White/Red

70mm | RS 40mm | 83a

- Rounded edge conical wheel with excellent rebound
- Made with a lively and long-lasting urethane that slides well without deteriorating.
- Stoneground for traction from the first push

Retro Flex Cruiser Wheel

Designed as an homage to 60s wheels with modern performance developments

10125041

_CLRBLK

Clear Black

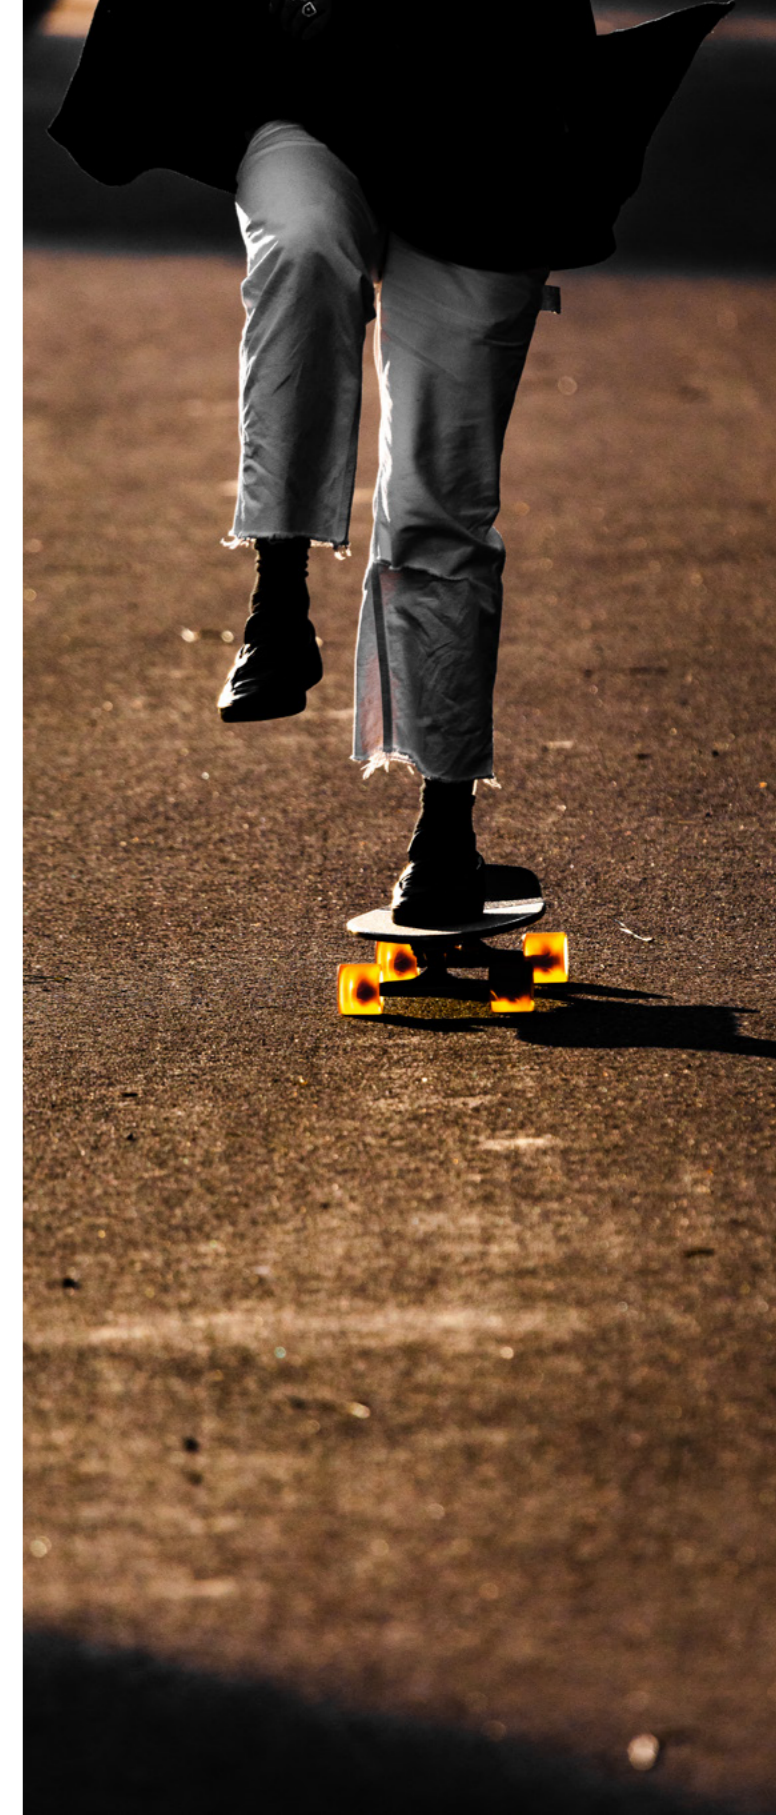

58mm | RS 45mm | 83a

_CLRRED

Clear Red

58mm | RS 45mm | 83a

- A retro cruiser with thick flat face that dives back into a deep conical
- Super sticky, holds turns and carves like a dream
- Natural, clear finish

TRUCKS & ACCESSORIES

Slant Surf Skate Trucks

Turn any board into a surf/skate with Slant's light-weight trucks that can be pumped to generate momentum, or pushed like a normal cruiser

10425005_BLK/RED

Black/Red

- Made from Magnesium, and using hollow axles, they're roughly 25% lighter than comparable aluminum trucks
- Designed to be closer to the ground, making it easier to push and control
- Set includes integrated riser pads and mounting hardware
- Backed by the Slant trucks guarantee

Slant Reverse Kingpin

Aluminum longboard trucks with reversible 50/54 degree hangers and grade-8 kingpins

10425001_RAW/RAW

Raw/Raw

- They come at 50 degrees for stability at high speeds
- Flip the hanger over to 54 degrees for even tighter turns
- Available in 150mm and 180mm

Slant Surf Skate Riser Pads (Single Pack)

Stackable risers to allow larger wheel clearance

11025005_BLK

Black

- Increases ride height by 1/8"
- Stack as many interlocking risers as desired underneath integrated riser pad.
- Made from recycled plastic

Skate T-Tool

13299001_BLACK

Black

Slant Mag Reverse Kingpin

Magnesium longboard trucks with reversible 50/54 degree hangers and grade-8 kingpins

10425002_GRY/BLK

Grey/Black

- 20% lighter than aluminum
- They come at 50 degrees for stability at high speeds
- Flip the hanger over to 54 degrees for even tighter turns
- Available in 150mm and 180mm

Griptape

An economic solution for multiple grip jobs

10725015_BLK

Black
9" x 20 yards

10725016_BLK

Black
10" x 20 yards

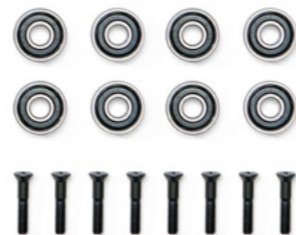

- Grips roughly 22 standard decks
- High strength adhesion and easy to cleanly trim

ACCESSORIES

13225020_RAW

Raw Finish

Everything But The Deck Kit

This kit contains all the components required to assemble a skateboard. Just add the deck of your choice.

- Contains Slant trucks, a full sheet of griptape, wheels, bearings, deck hardware, and a T-tool for assembly
- Truck sizes 5.0, 5.25, 5.5
- 53mm 99a G1 Street Wheels
- ABEC-7 bearings
- 1" Phillips head hardware
- FSC certified cardboard packaging

ACCESSORIES

13225021_WHT

White

Skateboard Deck Wall Hanger

Easy mounting system for displaying a skateboard on the wall.

- Metal bracket hangs easily and securely for the life of your display without any chance of bending or breaking
- Low profile shape and clean white painted finish nearly disappears against most walls
- Clear acrylic deck bolts mount your deck to the bracket creating as little distraction as possible
- Use 1 hook for vertical hanging or 2 for horizontal
- Easy to follow instructions included

Anniversary Book UNEMPLOYABLE

30 years of Hardcore, skate, and street. Unemployable is the story of a bunch of misfits who chose to create a world to exist in, rather than conform to one in which they didn't fit. Led by Australia's Hill brothers, the group went on to become industry pioneers, forming the skate, street and surf company, Globe International.
